## PROFESSIONAL EXPERIENCE

**Role: IT Business Analyst**

October 2021 – April 2024 | Bengaluru, India

**Epicminds Information Technology PVT LTD** 📍

### **Supplier Diversity Management System (SDMS) Web Application Development for the State of Delaware, United States**

- Spearheaded a dynamic team effort to conceptualize, design, and deploy the Supplier Diversity Management System (SDMS) for the Office of Supplier Diversity in the State of Delaware
- Meticulously gathered and analyzed business requirements, resulting in streamlined processes and heightened client satisfaction.
- Conceptualized and designed SDMS to align with digitalization objectives, fostering innovation and efficiency.
- Produced detailed project documentation, facilitating clarity and alignment throughout the project lifecycle.
- Utilized data-driven insights to inform decision-making processes, optimizing project outcomes and fostering continuous improvement within the Agile framework.
- Implemented rigorous manual testing methodologies to ensure the robustness and reliability of SDMS, resulting in a 20% decrease in bug reports from end-users and a 15% increase in overall system stability.

### **Building and Other Construction Worker (BOCW) Accounts and CESS Web Application Development for Government of Karnataka**

- Coordinated a collaborative team effort to drive the development of a groundbreaking web-based application project for the Government of Karnataka, aimed at revolutionizing accounts and cess management through digitalization.
- Spearheaded requirement gathering and analysis to ensure a comprehensive understanding of project objectives.
- Played a pivotal role in the design phase, fostering innovation and efficiency while aligning with digitalization objectives.
- Guided the project within an Agile framework, driving it toward successful milestones and ensuring client satisfaction.
- Demonstrated proficiency in manual testing methodologies to ensure application reliability.

### **Karnataka State Financial Corporation (KSFC) IDM Web Application Development for Government of Karnataka**

- Played an instrumental role in developing the KSFC-IDM web-based application for the Karnataka State Financial Corporation.
- Collaborated with stakeholders to discern specific requirements, leading to effective system design.
- Employed Agile methodologies to manage the project, ensuring iterative development sprints.
- Designed a robust data model facilitating seamless data management and retrieval.
- Conducted manual testing to verify software functionality and identify defects.

### **Unified University and College Management System (UUCMS) Finance and Assets Web Application for Government of Karnataka**

- Contributed significantly to the UUCMS-Finance and Assets project, aiming to digitalize finance and asset management systems for educational institutions.
- Collaborated with multiple educational institutions to understand their unique requirements.
- Contributed to the design and architecture, ensuring scalability and flexibility.
- Utilized SQL expertise to design and implement a robust database structure.
- Generated comprehensive financial reports and asset management insights to aid decision-making.

### **Project Oversight Mobile/Web-Based Application Development**

- Played a key role in developing a mobile/web-based application for project and resource management.
- Employed effective requirement gathering techniques to capture detailed requirements.
- Contributed to the design and architecture to ensure scalability and usability.
- Worked within an Agile framework to guarantee the success of the project.
